

**ABSTRACT**

The invention relates to a method for conveying dishes in a tunnel dishwasher and to a tunnel dishwasher. The tunnel dishwasher (1) comprises at least one washing zone (2, 3, 4) and a first conveyor (5a) arranged to move alternately forwards (F) and backwards (R), during which forward (F) motion the dishes (11) to be washed are arranged to be moved along with the first conveyor (5a) relative to the washing zone (2, 3, 4). The tunnel dishwasher (1) further comprises at least a second conveyor (5b) arranged to move in the opposite direction relative to the first conveyor (5a) in such a way that the first and the second conveyor (5a, 5b) are arranged to convey the dishes (11) to be washed alternately forwards (F).
